SUMMARY

Cybersecurity student pursuing B.Tech in Computer Science and Engineering (Cybersecurity), with hands-on experience in penetration testing, vulnerability research, responsible disclosure, and security monitoring. eJPT-certified, with experience building detection pipelines and security analysis tools. Recognized in Nokia's Security Hall of Fame.

CERTIFICATIONS

eLearnSecurity Junior Penetration Tester (eJPT) | Certified Red Team Operations Management (CRTOM) | Fortinet Certified Associate in Cybersecurity | AI in DFIR-Belkasoft | Advanced SQLite Queries-Belkasoft

TECHNICAL SKILLS

Security: Penetration Testing, Vulnerability Assessment, OWASP Top 10, API Security, Static Malware Analysis, Responsible Disclosure
SIEM & Detection: Elasticsearch, Kibana, Sysmon, Winlogbeat, Sigma, MITRE ATT&CK, Incident Investigation
Tools: Burp Suite, Nmap, Metasploit, Nessus, Wireshark, YARA
Technologies: Linux, Kali Linux, Docker, Flask, FastAPI, React, PostgreSQL, MongoDB Atlas
Programming: Python, Bash, SQL, Java, C

EXPERIENCE

Cloud Security Intern – SITER Norway Academy Jun 2026 – Jul 2026
- Completed a four-week internship covering cloud security, IAM, monitoring, and threat detection through practical labs.

Cybersecurity Intern – CodeAlpha 2024
- Performed web application penetration testing and vulnerability assessments using Burp Suite and Nmap.

Cybersecurity Intern – Alfido Tech 2024
- Conducted security audits, vulnerability analysis, and assisted with remediation activities.

SECURITY RESEARCH & RECOGNITION

- **Nokia Security Hall of Fame – August 2026:** Recognized for responsibly disclosing a high-severity vulnerability through Nokia's security disclosure program.
- **Nokia mcp-redfish – GHSA-jqwv-p97j-cxxj:** Credited researcher on a published critical advisory (CVSS 9.3) covering TLS certificate verification and unauthenticated SSDP host injection. Advisory
- **Nokia ncm-issuer:** Reported a missing authorization check in the certificate renewal workflow, documented in a public GitHub Security Advisory.
- **Woodpecker CI:** Reported matrix environment variable injection in the default clone step, addressed in v3.19.0 and acknowledged in release notes.
- **Additional disclosures:** AI Web Solutions (critical vulnerability and remediation verification); GenXploit (Broken Access Control Hall of Fame); Humphreys University (exposed email credentials).

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R & D Institute of Science and Technology 2024–2028
B.Tech in Computer Science and Engineering (Cybersecurity)

The High Range School 2014–2024
Higher Secondary Education

PROJECTS

CogniShield AI – Security Intelligence & Cloud Governance *Python, FastAPI, React, scikit-learn*
- Built a security analytics platform integrating ETL, Isolation Forest anomaly detection, Random Forest severity classification, explainable rules, risk scoring, ATT&CK mapping, compliance checks, and optional LLM integration.

Watchtower – SOC & Detection Engineering Platform *Python, Elasticsearch, Kibana, Sigma, Docker*
- Integrated Sysmon, Winlogbeat, Elasticsearch, and Kibana for Windows telemetry monitoring, with Sigma-based detections, ATT&CK mapping, and automated email alerts.

MallnSight – Static Malware Analysis Platform *Python, Flask, YARA, pefile*
- Developed offline file analysis for hashing, PE metadata, entropy, and suspicious strings, with YARA scanning, risk scoring, PDF investigation reports, and optional MongoDB history.
